

## Dental Hygiene, AAS

### School of Health Professions

---

#### Program Description

The Dental Hygiene AAS program offers the academic preparation and clinical training needed for a variety of dental hygiene careers. While most dental hygienists practice in private dental offices, others provide services in dental specialty practices, hospital and industrial clinics, correctional institutions, government health agencies, insurance companies and military services. With additional education through degree completion programs, dental hygienists also work in school systems, dental and dental hygiene education programs, dental sales and research. The program includes clinical experience in the college campus facility. Patients will come to campus for prophylactic dental care; however, students may need to secure patients to meet clinical requirements.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association. The Commission is a specialized accrediting agency recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653 or at 211 East Chicago Avenue, Chicago, Illinois 60611.

**This is a selective admission program. Please see the college website for details.**

#### Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Provide dental hygiene care for the child, adolescent, adult, geriatric and special needs patient.
- Prepare the dental hygiene process of care that includes comprehensive collection of patient data, analysis of assessment, establishment of a dental hygiene care plan, provision of comprehensive patient-centered treatment, measurement of goals, and accurate recording of documentation.
- Provide dental hygiene care for all types of classifications of periodontal diseases including patients who exhibit moderate to severe periodontal disease.
- Demonstrate interprofessional communication, collaboration and interaction with other members of the health care team to support comprehensive patient care.
- Recognize the oral health needs of community-based programs by planning an oral health program to include health promotion and disease prevention activities, implementing the planned program, and evaluating the effectiveness of the implemented program.
- Provide appropriate life-support measures for medical emergencies that may be encountered in dental hygiene practice.
- Apply ethical reasoning, ethical decision making and legal and regulatory concepts to the provision and/or support of oral health care services
- Identify self-assessment skills to prepare for life-long learning.
- Implement the use of current scientific literature
- Apply problem solving strategies related to comprehensive patient care and management of patients.
